Rittenhouse Candle & Soap Quarterly Newsletter

December 2008

Volume 1, Issue 1

## The Wax Wars

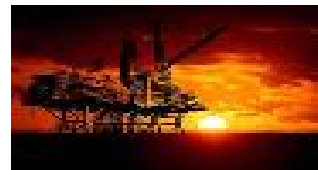

*Rittenhouse Candle & Soap uses all natural soybean wax. Unlike paraffin wax candles, soy wax candles do not produce harmful carcinogens, are water soluble, biodegradable, and burn substantially longer and cleaner, so you do not get that black soot build-up that you get from paraffin candles.*

*We as a nation have a dependence on crude oil. Did you know that paraffin wax is a derivative of crude oil?*

“The EPA states that indoor air quality is 3 times more polluted than outdoor air quality. Paraffin contributes substantially to the decline in indoor air quality and begs for a healthier alternative.”

Purchasing soy products supports the soy farmers of America, which stimulates our economy and lessens dependence on international resources.

Purchasing paraffin products not only supports our dependence on this crude oil but also supports an

(Off shore drilling site)

industry riddled with environmental faux pas.

Ultimately, it is your decision. But, now you have additional information so you can make an **informed** decision.

## Breaking News

Rittenhouse Candle & Soap partners with "Trees for the Future" to sponsor a village to help plant fast growing agro-forestry trees as well as useful grasses for erosion control.

Danyelle Lowman-Bush, Founder of Rittenhouse Candle and Soap, states.. *"This endeavor is in line with our philosophy of paying it forward and doing our part to preserve our environment."*

- We are currently negotiating with local shops to sell our products.
- We have a new jar size (12 oz) which sells for \$10.00
- Rittenhouse Candle and Soap Blog is on the horizon. (Stay Tuned)
